Good morning,

The Pre-RD group is currently stationed at target location PDI-AR-A24 (SIL array) and has retrieved the acoustic release. Benchmark GPS coordinates were taken at PH-1 prior to departing SIL using a Trimble GPS unit. An AED, first aid kit, spill kit, floatation device, radio, and sediment decontamination equipment are aboard the NRC vessel.

The Pre-RD group is recording serial numbers, tilt degrees, memory and battery status for the receivers and the acoustics prior to retrieval. A recovery GPS point was collected as the acoustic release was pinged and another point will be collected during deployment. Included are photos of the vessel equipment and acoustic retrieval (AR-A24).

Jonni
